

Kranthi Andhoj

Software Engineer | Snowflake | DBT | AWS | SQL |

Phone: +91-9949875599

Email: kranthikasqlbi@gmail.com

Address: Hyderabad / Bangalore, India

Linkedin: <https://linkedin.com/in/devopskranthika>

Work Permit: USA VISA

Technical & Professional Proficiencies

- 9 years of IT Experience including 3 years of Snowflake & dbt experience, including creating and managing databases, schemas, tables, views, and virtual warehouses. Developed and maintained dbt models for data transformation using SQL and Jinja. Worked on loading data into Snowflake using stages and COPY commands, managed model dependencies using ref(), executed dbt run, test, and compile commands, managed users, roles, and permissions, monitored performance, performed basic optimization, and ensured reliable, efficient, and reusable data pipelines.
- Experienced in database development using SQL by designing tables, views, stored procedures, and triggers. Developed optimized queries to support application requirements and improve performance. Implemented indexing strategies and data validation rules. Collaborated with application teams to support database changes, troubleshoot query issues, and ensure efficient data storage and retrieval
- Experienced in data analysis using SQL to extract, clean, and transform large datasets. Developed analytical queries to identify trends and insights for business decisions. Ensured data accuracy and quality through validation and checks. Collaborated with business teams to understand requirements and deliver meaningful data-driven insights for operational improvements

SKILLS

Snowflake | Data Buid Tool | AWS | SQL Server | Problem Solving | Attention To Detail | Analytical Thinking

EMPLOYMENT HISTORY

Software Engineer (Snowflake,DBT,AWS,SQL) | FinacPlus, Hyderabad

2022 - 2025

Snowflake Responsibilities

- Created and managed Snowflake databases, schemas, tables, views, and virtual warehouses to support business reporting and analytics requirements.
- Loaded structured and semi-structured data into Snowflake using internal/external stages and COPY INTO commands from different source systems.
- Developed SQL queries, views, and basic stored procedures to transform, validate, and prepare data for reporting and downstream applications.
- Managed Snowflake users, roles, and permissions by implementing role-based access control to ensure secure and authorized data access.
- Monitored virtual warehouse performance, optimized SQL queries, and performed basic maintenance activities to improve overall system performance.

DBT Responsibilities

- Developed and maintained dbt models to perform data transformation and build reliable data pipelines in the Snowflake environment.
- Created staging, intermediate, and mart models using SQL and Jinja templates to organize and transform data efficiently.
- Used ref() function to manage model dependencies, improve code reusability, and maintain proper execution order across dbt models.
- Executed dbt run, dbt test, dbt compile, and dbt docs commands to build models, validate data quality, and generate project documentation.
- Performed data quality testing, maintained reusable transformation logic, and collaborated with data engineering teams to deliver accurate and consistent datasets.

- Led end-to-end data pipeline development using **Snowflake** and **SQL**, improving reporting speed by 40%.
- Designed and implemented **data models and schemas** in Snowflake to support scalable analytics across departments.
- Optimized complex **SQL queries** and views for performance, reducing average query run-time by 60%.
- Directed a team of 4 analysts to develop **ETL workflows** using Snowflake tasks and streams for real-time insights.
- Defined and enforced **data governance and quality standards** using Snowflake's access controls and role-based security.
- Collaborated with BI teams to deliver business KPIs through **Snowflake views and Power BI dashboards**.
- Migrated legacy data warehouse to **Snowflake**, resulting in a 30% reduction in infrastructure costs and improved scalability.

- Developed optimized **T-SQL queries**, stored procedures, and views to support reporting and data analysis tasks.
- Built interactive **Power BI dashboards and reports** to visualize KPIs, increasing business decision-making speed by 35%.
- Designed and maintained **relational data models and star schemas** for analytical reporting.
- Performed **data extraction, transformation, and loading (ETL)** using SQL Server and Power Query.
- Implemented **row-level security (RLS)** in Power BI to control user access to sensitive data.
- Automated report refresh and delivery through **Power BI Service**, improving reporting efficiency.
- Collaborated with stakeholders to gather requirements, translate them into **SQL logic and Power BI visuals**.

- Implemented centralized MDM processes to ensure consistency and accuracy across customer, vendor, and product master data.
- Collaborated with cross-functional teams to define data governance policies and data quality rules for enterprise-wide MDM systems.
- Led data cleansing and deduplication initiatives using tools like Informatica MDM and SQL, improving data accuracy by 40%.
- Ensured data consistency and accuracy across systems by implementing robust data governance and validation rules.
- Collaborated with cross-functional teams to streamline master data processes and improve data quality KPIs by 30%.

EDUCATION

LANGUAGES

German | French | English | Hindi

HOBBIES

Playing Cricket, Chess and Reading Books

COURSES

AWS Cloud Quest: Cloud Practitioner at AWS	Jul 2025 - Feb 2023
AWS Educate Introduction to Cloud 101 at AWS	Jan 2023 - Feb 2023
AWS Ramp-Up Guide – Cloud Practitioner Path at AWS	Aug 2022 - Sep 2022
SQL and Database at Coursera	Sep 2020 - Oct 2020

INTERNSHIPS

Jul 2026 - Jul 2026

PROJECTS

Jul 2026 - Jul 2026
